BOSS COMPETITION FREESTYLER

Putting the pieces together

BMX PLUS! TEST

☐ The morning scene at Rip City's police station was chaotic. There were hundreds of kids rampaging through the halls, desperately searching for the Burglary Division in order to report their losses. It turned out that they all had had their freestyle bikes stolen by a thieving mob on the loose, and they were seeking the help of the law to get them back. The situation calmed down, though, when Officer Sparky Flint started to organize the panic.

"Okay, folks, let's all relax, form a single-file line, and I'll personally hear your reports one by one."

No sooner said than done, all the kids were anxiously waiting their turns in a line that stretched into the rear parking lot of the Rip City manor. The first kid in line seemed to be on the verge of a nervous breakdown. He, like the rest of the kids, had been a victim of a crime. Officer Flint promptly led off the interviewing with him.

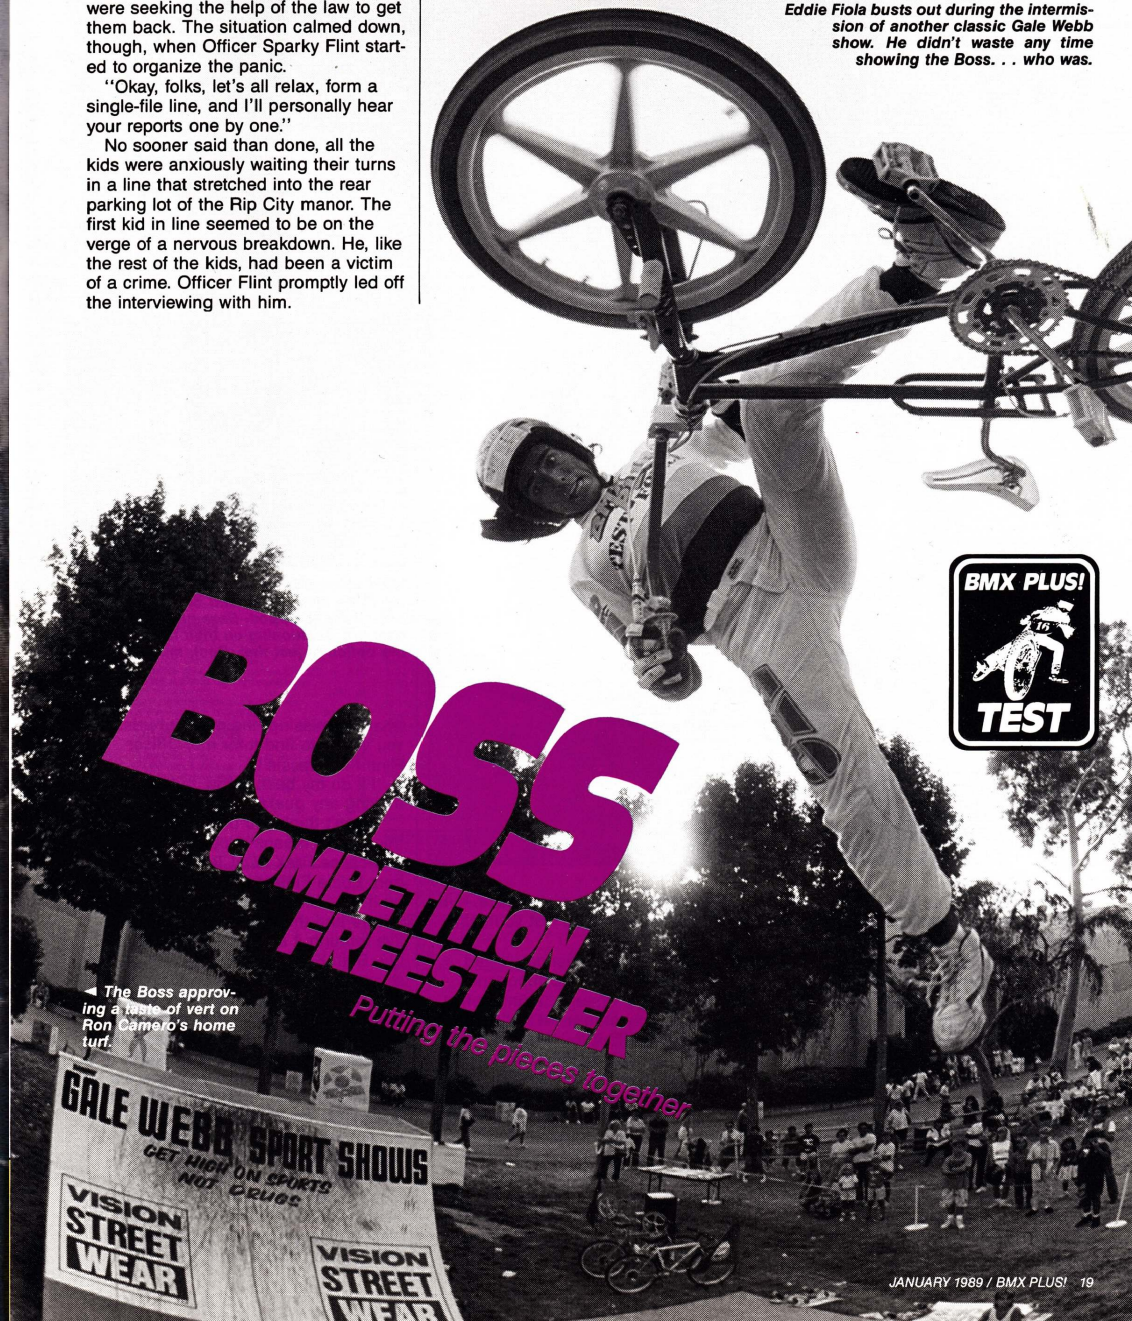
"Hang in there, son, and tell me your name and what's been stolen from you."

"My name's Iban Heisted and my Boss Competition Freestyler's been stolen! I just can't believe it. I mean, I chained it up and everything. Arrgghh!"

"All right, now just calm yourself down and give me the scoop on it."

"Okay, make a note of all this. When you first see it, right off the bat you'll notice its sleek frame and fork design. It has a single top tube that blends into

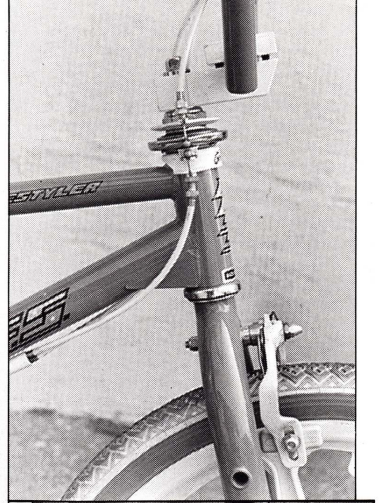
Eddie Fiola busts out during the intermission of another classic Gale Webb show. He didn't waste any time showing the Boss. . . who was.

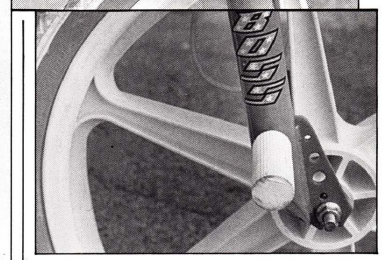


◄ *The Boss approving a taste of vert on Ron Camero's home turf.*

BOSS

Ron Camero went all out with this trick that he called a no-footed pedal-picker roll. It's funny, but it looked like a regular stationary decade to us.





What you see is what you get: an Odyssey Rotor stem, Gyro, and brakes. The pup's fully equipped. Boss gives you dual peg positioning on their forks for the option of just that. Cool, man, cool.

a nice and mellow framestanding platform. There are reinforcements welded behind its bottom bracket and underneath its head tube. The forks have dual peg positioning for freedom of choice and a slot in the left blade so that a Potts mod can be run internally for front brakes. The entire thing is caked in an ultimate purple color that has had the Janes of my neighborhood gazing at me since the day I bought it. Its bars have dual crossbars for strength and the Odyssey Rotor stem has six Allen-key bolts for a strong hold. The wheels on it are strong, too. Skyway six-spoked mags are just about as rugged a wheel as you can get. Are you getting all of this on that note pad of yours?''

''Oh, okay, so it's a purple bike, huh, son? It sounds like you lost yourself one heck of a ride.''

''I know . . . [brief silence]. It had some really nifty other components, too. Its two sets of pegs, 175mm one-piece chromoly cranks, 44T alloy chainwheel, 16T SunTour freewheel, and chromoly layback seatpost all helped make it one rad freestyling unit. Yeah, sure, it comes with some generic parts like imitation A'ME Unitron grips, Victor plastic pedals and Cheng Shin Stadium-type tires, but they never gave me any major problems. The really cool touch is that the pup is equipped with Odyssey brake calipers, RX-3 levers with locking buttons, and an authentic Gyro. The more I think about what I'm missing, the more it hurts. You've got to find it for me, Officer Flint! I'm stressin'!''

''I'll do my best, kiddo, but I'm not making any guarantees.''

''I don't think you understand. The thing really means a lot to me. I bought it because *BMX Plus!* Test Force members Eddie Fiola and Ron Camero tested it out. They put it through serious torture and the only thing that didn't live through it all was its top Gyro cable. Both Eddie and Ron thought it was a tad heavy and a little on the long side, but other than that, they thought it was great. Eddie shredded on a half-pipe with it and busted variations like lookbacks, one-handed one-footers and Hannahs after only two warm-up airs! It handled *that* well. And Ron was able to snap tricks on it almost as well as he could on his own bike. Wheelies of all sorts, rolling and combo tricks, and even a few barrides were all within Ron's limits. After I heard them talking about the test, I was convinced that it was a full-on, freestyle-ready ride. I'm telling you, Officer Flint, I had no re-

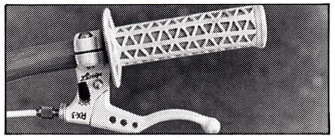
BOSS

The test scene: Tony Donaldson fiddles, Ron Camero chills, and a kid with a backwards stem trips.



Yup, the Boss comes stock with authentic Odyssey RX-3 levers, but as for its grips . . . guess again.

OFFICIAL *BMX PLUS!* TEST BIKE
PRO AND CON LIST
BOSS COMPETITION FREESTYLER

PROS	CONS
Dual fork peg positioning	Gyro cable snapped
Dual crossbar handlebars	Frame feels long
Beefy stem	Awkward rear cable routing
Two sets of pegs	Kinda on the heavy side
Authentic Tuff Wheels	
It's a complete freestyle setup

Oakland, CA 94661

Camero, again, taking the Boss for a little backyard exploring.

grets about the $280 that I dished out for it. But now it's gone and I can't handle it! I'm going nuts. You've got to help me!"

"Just go home and relax, kiddo. There's nothing more you can do here. I'll give your case my best attention, and please, don't call me, I'll call you."

Iban pleaded his case with Officer Flint for a few more minutes before he journeyed home in his deeply depressed state. Officer Flint felt for Iban and he was going to see to it that Rip City's police force did their best to retrieve his investment. He knew that it would be a tough chore to locate such a cool bike, though. Maybe next time Iban could chain his prized possession to a streetlight instead of a tree because of the fact that trees can be chopped down. Bet he never thought of that! □
